

IN THE CLAIMS:

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~striketrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Please AMEND claims 1 and 4-8 and ADD new claim 9 in accordance with the following:

1. (currently amended) An E-mail system₁ comprising:

a receiving device receiving transmission information transmitted from a sender to a plurality of receivers;

an emphasizing device emphasizing and highlighting different parts of the transmission information for each receiver ~~respective receivers~~, and preparing E-mail information with the transmission information in which the different parts are highlighted for each receiver ~~respective receivers~~; and

a transmitting device transmitting the E-mail information for ~~each receiver~~ respective receivers.

2. (original) The E-mail system according to claim 1, wherein the receiving device receives a part of the transmission information that the sender designates and information about a corresponding transmission destination, and the emphasizing device emphasizes and highlights the designated part and prepares E-mail information for a receiver corresponding to the transmission destination.

3. (original) The E-mail system according to claim 1, further comprising a storing device storing keyword information predetermined for each receiver, wherein the emphasizing device emphasizes and highlights a part including the keyword information when the keyword information is included in the transmitted information, and prepares E-mail information for a receiver corresponding to the keyword information.

4. (currently amended) A terminal apparatus₁ comprising:

a transmitting device transmitting transmission information prepared for a plurality of receivers; and

an indication device indicating E-mail information that emphasizes and highlights different parts of the transmission information for each receiver respective receivers, to be sent to ~~each receiver~~ respective receivers.

5. (currently amended) A computer-readable recording medium recording a program causing a computer to perform:

receiving transmission information from a sender to a plurality of receivers;
emphasizing and highlighting the different parts of transmission information for ~~each receiver~~ respective receivers;
preparing E-mail information for ~~each receiver~~ respective receivers; and
transmitting the E-mail information for ~~each receiver~~ respective receivers.

6. (currently amended) An E-mail transmitting method, comprising:
preparing transmission information to be transmitted from a sender to a plurality of receivers;

emphasizing ~~and emphasizing~~ the transmission information for ~~each receiver~~ respective receivers;

preparing E-mail information for ~~each receiver~~ respective receivers;
transmitting the E-mail information for ~~each receiver~~ respective receivers; and
emphasizing and displaying the transmission information for respective receiver ~~each receiver~~.

7. (currently amended) An E-mail system, comprising:

receiving means for receiving transmission information transmitted from a sender to a plurality of receivers;

emphasizing means for emphasizing ~~and emphasizing~~ the transmission information for respective receiver ~~each receiver~~, and preparing E-mail information for respective receiver ~~each receiver~~; and

transmitting means for transmitting the E-mail information for respective receiver ~~each receiver~~.

8. (currently amended) A system for propagating a signal ~~propagating a program for~~ from a propagating computer to the receiver computer ~~computer~~, said propagating computer of said system comprising a program, said program causing the computer to perform:

receiving transmission information transmitted from a sender ~~for~~ to a plurality of ~~the~~
~~receiver computers~~ receivers;

emphasizing and highlighting the different parts of transmission information for
respective receiver computers ~~each receiver~~ and preparing E-mail information for respective
receiver computer ~~each receiver~~; and

transmitting the E-mail information ~~for~~ to respective receiver computer ~~each receiver~~.

9. (new) A method, comprising:
- receiving information for different destinations with the information having different parts;
 - emphasizing the different parts responsive to the destinations;
 - sending the information by email to the destinations with each destination receiving the information with at least one of the parts emphasized responsive to the destination; and
 - displaying the information with the one of the parts emphasized at at least one of the destinations.
